

# ACCESSORY ADAPTERS

Accessory adapters are the perfect solution for those complicated piping arrangements found at larger air handlers and for pumping system heating and cooling coils. Accessory adapters can hold up to four accessory port openings for drains, P/T ports, gauge cocks and thermo wells.

## ADVANTAGES

- Fabricated in the U.S.A.
- Quick delivery of stock sizes
- Saves space in crowded mechanical rooms
- Avoid extra fittings with the proper end connections (male, weld, flanged and grooved)
- Reduces labor costs by providing all the ports required
- Custom fabricated and stock sizes 2" I.D. through 12" I.D.
- Use with a flexible connector and have it built in one piece!
- May be installed effectively in a vertical or horizontal pipeline
- Custom accessory adapters can be fabricated to meet your exact specifications

## APPLICATIONS

- Pump Suction and Discharge Connections
- Plate and Frame Heat Exchanger Connections
- Steam to Water or Water to Water Heat Exchangers

## END FITTINGS

FW - Flange and Weld

RFW - Reducing Flange and Weld

FM - Flange and Male

RFM - Reducing Flange and Male

FF - Flange and Flange

RFF - Reducing Flange and Flange

FG - Flange and Groove

RFG - Reducing Flange and Groove
