

STAMPED

Selection of the proper metal hose assembly for any given application should take into account the following seven considerations. They are known as STAMPED.

S

SIZE

ID - What is the internal diameter of the hose?
OAL - What is the overall length of the assembly?

T

TEMPERATURE

What is the operating temperature of the media?
What is the design temperature of the system?

A

APPLICATION

How is the assembly being used? Vertical or horizontal positioning?
Are there any special requirements? Pulsations or vibrations?

M

MEDIA

What is the media or material that is flowing through the hose?
Is the media compatible with the hose?

P

PRESSURE

What is the operating or working pressure?
What is the design PSI?

E

ENDS

What are the end fittings?

D

DELIVERY
